

REMS Mini-Press ACC

Cordless radial press with automatic circuit control

Universal, super handy electric tool with automatic circuit control for producing pipe pressing joints for all common pressfitting systems. Li-Ion technology. For battery and corded operation.

Pipe pressing joints $\varnothing$ 10–40 mm

Complete range of REMS pressing tongs Mini for all common pressfitting systems, see page 108–118.

REMS Mini-Press ACC Li-Ion – universal up to $\varnothing$ 40 mm. Super light, super small, super handy.

With automatic circuit control. Secure crimping in seconds. Automatic locking of the pressing tongs.

Pressing tongs for all common systems

Complete assortment of REMS pressing tongs Mini for all common pressfitting systems (page 108–118). High-compression pressing tongs in forged and specially hardened steel. Pressing contours of REMS pressing tongs are system-specific and correspond to the respective pressfitting system. Thus perfect system-conformity, safe press jointing.

Execution

Super light, super small, super handy. Drive unit with battery only 2.4 kg. Drive unit with pressing tongs under 34 cm. Works anywhere, free-hand, overhead, also in particularly tight areas. Optimum weight distribution for single-hand operation. Ergonomically designed housing. Swivelling pressing tongs seat. Secure seating of pressing tongs by automatic locking. For battery and corded operation. Electronic charging status check with flat battery protection and charging status indicator with 2-coloured LED

Pressing operation by touch-control with ACC

For reliable service, operating and functional safety. Automatic retraction after completion of pressing operation (automatic circuit control).

Drive

Enormous thrust and pressing force for fast and perfect press jointing. Powerful electro-hydraulic drive with powerful battery motor 14.4 V, 420 W output, robust planetary gear, eccentric reciprocating pump and compact high power hydraulic system. Safety tip switch.

Battery or mains operation

Battery Li-Ion 14.4 V with 1.65, 2.2 or 3.5 Ah capacity. Powerful and light. 20% faster and 30 % lighter than Ni-Cd 12 V. Height energy density for approx. 50 % more pressings than Ni-Cd 12 V. Li-Ion 14.4 V, 3.5 Ah battery for approx. 370 pressings Viega Profipress DN 15 per battery charge. Overheating and over-loading protection by temperature monitor (NTC). Rapid charger for short charging times. No memory effect for maximum battery performance. Voltage supply Li-Ion 230 V for mains operation instead of battery Li-Ion 14.4 V, as accessory.

Confirmation of suitability

See page 139.

Hold-Harmless and Indemnification Agreement

German Quality Product

Supply format

REMS Mini-Press ACC Li-Ion Basic-Pack. Cordless radial press with automatic circuit control for producing pipe pressing joints $\varnothing$ 10–40 mm. For operating with REMS pressing tongs Mini. Swivelling pressing tongs seat with automatic locking. Electro-hydraulic drive with powerful battery motor 14.4 V, 420 W, robust planetary gear, eccentric reciprocating pump and compact high power hydraulic system. Safety tip switch. Battery Li-Ion 14.4 V, 1.65 Ah, rapid charger Li-Ion/Ni-Cd 230 V or 110 V, 50–60 Hz, 65 W. In sturdy steel case.

Select pressing tongs Mini yourself!

Search for the required pressfitting system in the opposite table and select the correct pressing tongs size. Please note that pressfitting systems for gas installation may only be pressed with the Mini pressing tongs which are highlighted in yellow in the table.

High-compression pressing tongs in forged and specially hardened steel. Pressing contours of REMS pressing tongs are system-specific and correspond with the respective pressfitting system. Thus perfect system-conformity, safe press jointing. Pressing jaws of pressing tongs manufactured on CNC production centres ensure high-precision machining of pressing contour. Hence far closer tolerances compared to as cast pressing contour.

Drive through REMS Mini-Press ACC drive unit. Read and follow the installation and assembly instructions of the system provider/ manufacturer.

Traceability according to EN 1775:2007

REMS pressing tongs Mini with pressing contour M, V, SA, B, RN and UP have worked a specific marking into the pressing contour which leaves a lasting impression on the pressed fitting after the pressing process. This enables the user to check again whether the most suitable pressing tongs have been used to make the pressfit connection even after the pressing process.

With this traceability REMS fulfils the recommendations of the European standard EN 1775:2007 for the installation of pressfitting systems for gas.

Example REMS pressing tongs Mini V: "V" imprint on pressed fitting for traceability according to EN 1775:2007

Pressfitting systems for gas installations must only be pressed with REMS pressing tongs Mini which are highlighted in yellow.

Comply with national standards.

¹⁾ Only pressing tongs from designation "108" (1st quarter of 2008), "208" (2nd quarter of 2008) etc. can be used. The designation is stamped on every pressing jaw.

²⁾ For taking suitable pressing inserts.

The suitability of REMS pressing tools for pressfitting systems: Date 01.10.2012. For the updated situation regarding suitability status check our website:

www.rems.de → Downloads → Product catalogues, brochures → REMS Catalogue.

Pressing tongs for additional pressfitting systems on request.

Pressfitting systems for gas installations must only be pressed with REMS pressing tongs Mini which are highlighted in yellow.

Comply with national standards.

¹⁾ Only pressing tongs from designation "108" (1st quarter of 2008), "208" (2nd quarter of 2008) etc. can be used. The designation is stamped on every pressing jaw.

²⁾ For taking suitable pressing inserts.

The suitability of REMS pressing tools for pressfitting systems: Date 01.10.2012. For the updated situation regarding suitability status check our website:

www.rems.de → Downloads → Product catalogues, brochures → REMS Catalogue.

Pressing tongs for additional pressfitting systems on request.

Pressfitting systems for gas installations must only be pressed with REMS pressing tongs Mini which are highlighted in yellow.

Comply with national standards.

¹⁾ Only pressing tongs from designation "108" (1st quarter of 2008), "208" (2nd quarter of 2008) etc. can be used. The designation is stamped on every pressing jaw.

²⁾ For taking suitable pressing inserts.

The suitability of REMS pressing tools for pressfitting systems: Date 01.10.2012. For the updated situation regarding suitability status check our website:

www.rems.de → Downloads → Product catalogues, brochures → REMS Catalogue.

Pressing tongs for additional pressfitting systems on request.

Pressfitting systems for gas installations must only be pressed with REMS pressing tongs Mini which are highlighted in yellow.

Comply with national standards.

¹⁾ Only pressing tongs from designation "108" (1st quarter of 2008), "208" (2nd quarter of 2008) etc. can be used. The designation is stamped on every pressing jaw.

²⁾ For taking suitable pressing inserts.

The suitability of REMS pressing tools for pressfitting systems: Date 01.10.2012. For the updated situation regarding suitability status check our website:

www.rems.de → Downloads → Product catalogues, brochures → REMS Catalogue.

Pressing tongs for additional pressfitting systems on request.

Pressfitting systems for gas installations must only be pressed with REMS pressing tongs Mini which are highlighted in yellow.

Comply with national standards.

¹⁾ Only pressing tongs from designation "108" (1st quarter of 2008), "208" (2nd quarter of 2008) etc. can be used. The designation is stamped on every pressing jaw.

²⁾ For taking suitable pressing inserts.

The suitability of REMS pressing tools for pressfitting systems: Date 01.10.2012. For the updated situation regarding suitability status check our website:

www.rems.de → Downloads → Product catalogues, brochures → REMS Catalogue.

Pressing tongs for additional pressfitting systems on request.

Pressfitting systems for gas installations must only be pressed with REMS pressing tongs Mini which are highlighted in yellow.

Comply with national standards.

¹⁾ Only pressing tongs from designation "108" (1st quarter of 2008), "208" (2nd quarter of 2008) etc. can be used. The designation is stamped on every pressing jaw.

²⁾ For taking suitable pressing inserts.

The suitability of REMS pressing tools for pressfitting systems: Date 01.10.2012. For the updated situation regarding suitability status check our website:

www.rems.de → Downloads → Product catalogues, brochures → REMS Catalogue.

Pressing tongs for additional pressfitting systems on request.

Accessories

Description	Art.-No.
Steel case with insert for 8 pressing tongs Mini/cropping tongs Mini and compartment for pipe cutter up to 42 mm	578295

REMS cropping tongs Mini

Accessories for REMS Mini-Press ACC

High performance cropping tongs Mini in forged and specially hardened steel for cutting threaded rods.

Steel, stainless steel up to hardness classification 4.8 (400 N/mm²) M 6–M 10

REMS cropping tong Mini – cuts in just 2 seconds!

Made of forged and specially hardened steel.

Reversible cropping inserts for double service life.

M cropping inserts with high precision thread contour machined on CNC machining centres for exact guiding of the threaded rod in the cutting process. Pliers parts, cropping inserts and specially machined and hardened cutting edges, made to fit exactly, for cutting without burr.

Threaded rod can be screwed into a threaded connection of the pipe clip or the nut without rework after cutting.

Cutting device in pliers design (**Patent EP 1 459 825, patent US 7,284,330**). Driven by REMS Mini-Press ACC.

German Quality Product
